AMENDMENT

Sir:

  This Amendment is submitted in response to the Office Action dated April 23, 2002, relating to the above-identified application. Applicant respectfully requests consideration of the above-identified application in view of the following amendments and remarks.

In the Claims

  Please amend claim 2.

  Please add new claims 4-11 as follows:

2. (Once Amended) A system for adaptively rendering, to users of a network application, a
2 plurality of content pages generated from among a plurality of content objects created by an
3 author of the application, the system comprising:
4 (a) one or more databases for storing information relating to the application and its users,
5   including:
6   (i) individual, cumulative or aggregate user profile, platform and behavioral data;
7   (ii) content objects created by the author of the application at a plurality of levels of
8   abstraction, including a plurality of interconnected pages and a plurality of intra-
9   page content objects;
10   (iii) application state data; and
11   (iv) application rules directing the system to select one or more of the content objects
12   for delivery to one or more users of the application if one or more conditions
13   relating to the application state data are satisfied;
